

"The Insider" By Virginia Terhune Van De Water

(Copyright, 1917, Star Company.)

Elizabeth Gets a Sidelight on Hugh Parker and Her Employer and Dreams of Two Men.

(Continued From Last Week's El Paso Herald.)

BEFORE I could answer my companion's question, there was a blinding flash of lightning and another clap of thunder. The wind increased with such violence that it almost took my breath away.

"Oh," I gasped, "let me go in alone! I may not like it!"

Hugh Parker laid a strong hand on my wrist. "What do you mean?" he asked hoarsely. "What right has he to object to your being here with me?"

No right—yet," I quivered. "But he wants—I mean—I half promised—"

"You mean," Hugh questioned sternly, "that you love him?"

"No—no!" I protested. "I don't love him—but I have told him that."

Someone was hurrying along the sands toward us. My companion seized my arm, as a gust of rain struck us in our faces, and ran with me to the steps at the top of which my employer stood.

"Elizabeth Parker," Brewster Norton exploded. "What does this mean? Where have you been?"

He carried an electric torch, and as he flashed it upon us I was painfully conscious that I wore a loose negligee, and that my hair was tossed by the wind. I was glad that Hugh had brought out to me a few minutes ago.

"It was so hot upstairs that I came down to get cool," I explained, my teeth chattering. "And Mr. Parker happened to get here just before the storm broke."

At Hillebrand's light in the lower hall was always left burning at night, and by its gleam through the open door I saw that my employer was very pale. I was sure that he was angry, but his self-control was phenomenal.

"I see," he said, dryly. "And where is Tom?"

"He went indoors some time past," Hugh Parker said. "I took a walk after he left me. And I saw Miss Hart sitting there on the bench as I crossed the orchard, and I, too, stopped to get cool and watch the storm rise. Shall we go in? We are all three getting wet."

I envied him his calm bearing. He had nothing to be ashamed of. I reflected quickly, so he must not be afraid.

He looks old," Brewster Norton agreed, with an effort to speak naturally. "It appears that most of the family are awake. Mrs. Gore called out to me just now to be sure to shut all the windows—as if that were not the very thing that I came down stairs for."

Beauty Chats By Edna Kent Forbes

Lemon Aides.

THE value of a lemon as a beauty aid cannot be overestimated. Pure lemon juice is the best bleach in the world, its use will overcome tan and sunburn, help eliminate freckles, remove stains from the hands, and keep them white. Take away ugly stains from under the nails, and being astringent, at the same time, lemon juice will overcome extreme oiliness of the skin, and aid in removing blackheads and such eruptions.

A lemon is an invaluable beauty aid.

In removing blackheads and such eruptions. I have found that a soothing lotion is made from mixing equal parts of lemon juice, glycerine and rose water. To this can be added a few drops of grain alcohol, to help preserve the lotion, but the last named is not necessary. I always keep a bit of lemon in the soap dish in the kitchen, and after paring vegetables that stain or washing dishes, or any tasks that are hard on the skin, I rub the lemon over my hands to remove all stains and marks and at the same time, lose the ugly smell from hot dish water.

And the best thing about lemon as a beautifier is its cheapness. And it is always pure, and always mild. It is one of the most refreshing things that can be included in the toilet.

Questions and Answers. Anxious—Your letter was answered some time ago—no, agar agar has no effect upon rheumatism. This also is a disease due to faulty elimination, but the bladder is more directly responsible than the bowels.

Miss A. D.—The crookedness of the nose to the corners of the mouth are the natural result of laughing, probably you have a little trick of opening your mouth wider than most when you laugh, and at your age, in the mirror, and see whether you cannot modify the habit, laughing heartily without spreading the mouth. Roxy cheeks are the result of good health—you must have that first. Washing the face with hot and then cold water will help bring the roses to the cheeks, however.

Suffragist Leader Urges Women Not To Aid With the Second Liberty Loan

Baltimore, Md., Oct. 3.—Although she helped with the first Liberty Loan, Mrs. Henry O. Havemeyer, of New York, a member of the advisory council of the National Woman's party, in an address here before 150 suffragists yesterday, urged them not to lift a finger to help the second Liberty loan.

"I haven't the nerve to ask money," she said, "for a battle for democracy when we who demand through democracy are thrown into jail for doing so."

The suffragists present greeted her with applause and most of them declared they were ready to follow her advice.

Mrs. Abby Scott Baker, of Washington, an official of the National Woman's party, urged the women to boycott the loan. She said she had three sons in the service of the government but that made no difference.

The suffragists present greeted her with applause and most of them declared they were ready to follow her advice.

14 Years Ago Today

From The Herald of this Date, 1903.

CL. A. S. GREGG, who is preparing the big sanitarium for the Alamosa, left last evening for the north and east, and he expects in a few days to be able to announce that work will start almost immediately on the project. The concern will cost a million dollars, and according to the plans will be the finest in the country.

Mrs. J. E. Hibbert and children left Friday morning for Maxwell, N. M., to visit friends.

Dr. and Mrs. J. D. Powers and Dr. and Mrs. A. N. Randall of Chicago, and Mr. and Mrs. A. N. Randall, returning from California.

Office W. D. Grest has returned from Nashville, Tenn., accompanied by his wife and son, who have been spending several months here.

It is Kettler has a sweet potato weighing 5 1/2 pounds which was grown in the valley by C. M. Lyman, and which he is exhibiting today as proof of what can be done in this vicinity in matters of irrigation.

Mr. J. Doherty and party, of Los Angeles, who have been investigating the oil fields of the Alamosa, came in on the Mexican Central last night and will leave over the Santa Fe this evening for the private car.

"Estrella," Mr. Doherty is interested in a field which is said to be rich in asphaltum, of very fine quality, near El Paso, on the line of the Central. The California promoter, who was formerly heavily interested in the oil fields of this state, is now devoting his time and attention to Mexico asphalt.

Joe Barjoda, who has been examining the Esmeralda mine in the Mesquite district, says it is phenomenally rich in gold. It has 250 feet of development work done and every foot of it shows free gold in high values. The Esmeralda is 15 miles east of Car. He reported favorably on it and it will be purchased by El Paso and Denver parties.

MAXWELL

Most Miles per Gallon

Most Miles on Tires

\$950

F. O. B. FACTORY

A motor truck must submit, and PASS, the acid test of COST.

That is the test we want you to apply to the one-ton Maxwell truck—its first cost—and its operating cost.

A Maxwell truck—which is a REAL truck, worm-driven—sells at a price that can not be met in any other motor vehicle of like efficiency, durability, and economy.

A Maxwell truck will cover 100 miles in a work day—twice the distance covered by two teams and two drivers.

It will do this at an operating cost of less than that of one team of horses.

Moreover, it is of a size and capacity adapted to the needs of almost every form and phase of commerce, industry, or farming.

The question is not, "Can I afford to have a Maxwell truck?"

The FACT is, Mr. Business Man, you can not afford to be without one.

One-ton Truck Chassis \$865; Chassis with cab and windshield \$900; Chassis with cab, windshield, and Stake Gate Body \$950.

BUQUOR MOTOR CO.

Terms If Desired. Phone 2607. 813-815 Mesa Ave.

TO THOSE WHO HAVE THOUGHT OF BUYING A CHALMERS CAR

An arrangement has been effected whereby the Maxwell Motor Company has leased for a period of five years the properties of the Chalmers Motor Company. The immediate effect of this transaction is:

1. The Chalmers car will be continued under the Chalmers name for a period of five years.
2. Those distributors or dealers who have been successfully marketing the Chalmers car will continue to do so.

The appraisers of the property and their engineers report the current Chalmers model a good car and the Chalmers plant a wonderful factory.

The first move we have made is to increase the efficiency of the Chalmers organization.

The second move was to place behind the Chalmers car the resources of the Maxwell Motor Company.

This is a business transaction between two automobile companies of probably no more than ordinary interest to the public but important to you if you have thought of buying a Chalmers for these obvious reasons:

1. You obtain a good car.
2. You obtain a car produced in a magnificently equipped plant.
3. You obtain a car produced by an organization materially strengthened by the addition of able executives.
4. You obtain a car produced by an organization materially strengthened by additional financial resources.
5. You obtain a car from a distributor or dealer who will have the support of this organization.

In this way all three of us prosper in the transaction.

Walter E. Standish

President and General Manager
Maxwell Motor Company, Inc.

HOROSCOPE.

Thursday, Oct. 4, 1917.

QUIET day, according to the reading of the stars, which rule lightly during this configuration.

It is a time in which forces are gathered for tremendous outbreak, the stern declare. Men and nature will be equally affected by the conflict of elemental power.

There is rather a sinister sign for persons who hold places of power whether in the state, the army or navy.

Criticism will rise on every side, owing to the loss of the money of the money, and in the next few months revolutionary propaganda will cause much trouble, as it will gain acceptance in high places.

This is not a favorable rule under which to seek positions or appointments.

As next month is a time when, according to astrology, foreign affairs will take a new turn, this month may be a time of grave anxieties and uncertainties.

Certain educational institutions will be seriously affected in the earlier part of the school year, it is predicted, but they will recover to a certain extent later and will achieve unusual success in the line of high service.

First in place of accident and accidents to shipping are foretold for this month.

Mistakes in the administration of affairs of supreme moment to the world will cause much discontent before the new year dawns forth.

Warning is given that enemies will come in the guise of friends and betray those who received them in good faith.

Persons whose birthdate it is have the forecast of a quiet year which their affairs will proceed as usual, despite the world's upheaval.

Children born on this day will make many friends and succeed better in social than in business affairs. These subjects of Libra are likely to love art and all related pleasures and will, right, 1917, by the McClure Newspaper Syndicate.)
